

SANIDHYA SINGH

Full-Stack Developer · Data Science Enthusiast

+91 7828596083 | ssanidhya75@gmail.com | github.com/sanidhya091 | [LinkedIn](#) | Jabalpur, MP

SUMMARY

B.Tech CSE (Data Science) student building production-ready full-stack apps. Created an AI Code Review Platform, AI Invoice Tracker, and Anveshak — a NASA Space Apps Challenge planetary data visualization tool. Completed simulations with JPMorgan Chase, Commonwealth Bank, and Siemens Mobility. Strong full-stack fundamentals with growing expertise in Spring Boot and microservices.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL **Backend:** Node.js, Servlets, JDBC, Spring Boot (learning), Kafka, REST APIs **Frontend:** React, Next.js 14, Tailwind CSS, HTML5, CSS3 **Databases:** MySQL, PostgreSQL, Supabase, H2, Spring Data JPA **AI & APIs:** Groq API, LLaMA 3.3 70B, RestTemplate **Auth:** Clerk v7, Row Level Security **Tools:** Git, GitHub, Maven, Vercel

PROJECTS

Anveshak — Planetary Data Visualization & Analysis | NASA Space Apps Challenge 2025 2025

FastAPI · Python · timm · FAISS · Rasterio · Svelte · Leaflet.js · NASA Trek APIs

- Built a planetary data visualization platform with an interactive map-based interface for exploring NASA imagery across 3+ datasets.
- Integrated AI-powered similarity search (FAISS) and feature extraction (timm) enabling comparison of geographic features across planetary datasets.
- Engineered a Svelte + Leaflet.js frontend and FastAPI backend with a custom NASA Trek API data pipeline.

Lost & Found Portal 2024

Java · Servlets · JDBC · MySQL · HTML5 · CSS3 · JavaScript

- Engineered a campus web portal for reporting and searching lost items, reducing item recovery time by 50%.
- Applied user authentication and item management with Java Servlets and JDBC with MySQL, supporting 100+ concurrent users.

CodeSense — AI Code Review Platform 2025

Next.js 14 · TypeScript · Tailwind CSS · Supabase · Clerk v7 · Groq API · LLaMA 3.3 70B

- Built a full-stack AI code review app with color-coded feedback by severity (critical, warning, suggestion) via Groq API + LLaMA 3.3 70B.
- Enforced auth with Clerk v7, stored review history in Supabase (Postgres) with Row Level Security, and built an auto language-detecting code editor.

AI Invoice Tracker 2025

React · Tailwind CSS · Node.js · PostgreSQL · Clerk v7 · Groq API

- Architected a full-stack invoice management app with CRUD support and a responsive UI, achieving a 92% adoption rate.
- Integrated Groq API for AI-powered item description generation and added one-click PDF export with Clerk v7 authentication.

JOB SIMULATIONS & CERTIFICATIONS

JPMorgan Chase — Software Engineering Simulation Forage · March 2026

- Integrated Apache Kafka into a Spring Boot microservice, reducing message processing latency via asynchronous ingestion across configurable topics.
- Executed transaction validation with Spring Data JPA + H2 SQL; built REST endpoints and verified with Maven test suites.

Siemens Mobility — Project Manager Simulation Forage · March 2026

- Established 10+ strategic KPIs and maintained Excel dashboards for rail infrastructure reporting, improving milestone visibility.

Commonwealth Bank — Tech Explorer Simulation Forage · January 2026

- Completed cross-functional simulation across software engineering, cybersecurity, and data science; led requirement gathering for a banking app.

NASA Space Apps Challenge 2025 — Certificate of Participation January 2026

- Participated in the Jabalpur Edition organised by Gyan Ganga Institute of Technology and Sciences; built Anveshak as the challenge submission.

EDUCATION

B.Tech CSE — Data Science | Gyan Ganga Institute of Technology and Sciences, Jabalpur, MP 2023 – 2027

Coursework: DSA, OOP, DBMS, Web Technologies, Data Science Fundamentals

High School Diploma | Little Kingdom Sr. Sec. School 2023
